

A Petition
to the
Alpha Kappa Pi Fraternity
from
The Delta Sigma Chi
of
The Pennsylvania State College

April 25, 1930

THE PETITION

In order to better develop and perpetuate the ideals of fellowship and brotherhood upon which The Delta Sigma Chi Fraternity was organized, realizing that those ideals can find deeper expression and greater fruition by our affiliation With Alpha Kappa Pi Fraternity and being fully cognizant of the responsibilities and benefits which may become ours as a result of their action, we, the undersigned officers of the Delta Sigma Chi Fraternity of The Pennsylvania State College upon unanimous vote of our active members, respectfully petition that the Delta Sigma Chi Fraternity be granted a charter of membership in Alpha Kappa Pi Fraternity.

T. Stewart Goas President.
John A. Harris, Secretary.

The Delta Sigma Chi Fraternity

HISTORY

The organization which was later known as The Delta Sigma Chi Fraternity was formed in December of 1920. The founders were J.F. Horting, P.D. Andrews and M.K. Bare. They gathered about them nine other members of similar interests and ideals. The purpose of the group was to bring the social and intellectual advantages of fraternity life within the financial reach of the average student. The group was granted a charter as the Delta Sigma Chi Fraternity by the Pennsylvania State College on December 8, 1920.

Professor E.J. Kunze of the Engineering School was selected as faculty advisor. The first officers were president, M.K. Bare, vice-president T.W. Benze, secretary, P.D. Andrews, and treasurer J.F. Horting. One of the first achievements was to procure a charter of incorporation under the laws of the State of Pennsylvania, which was effected in December of the following year.

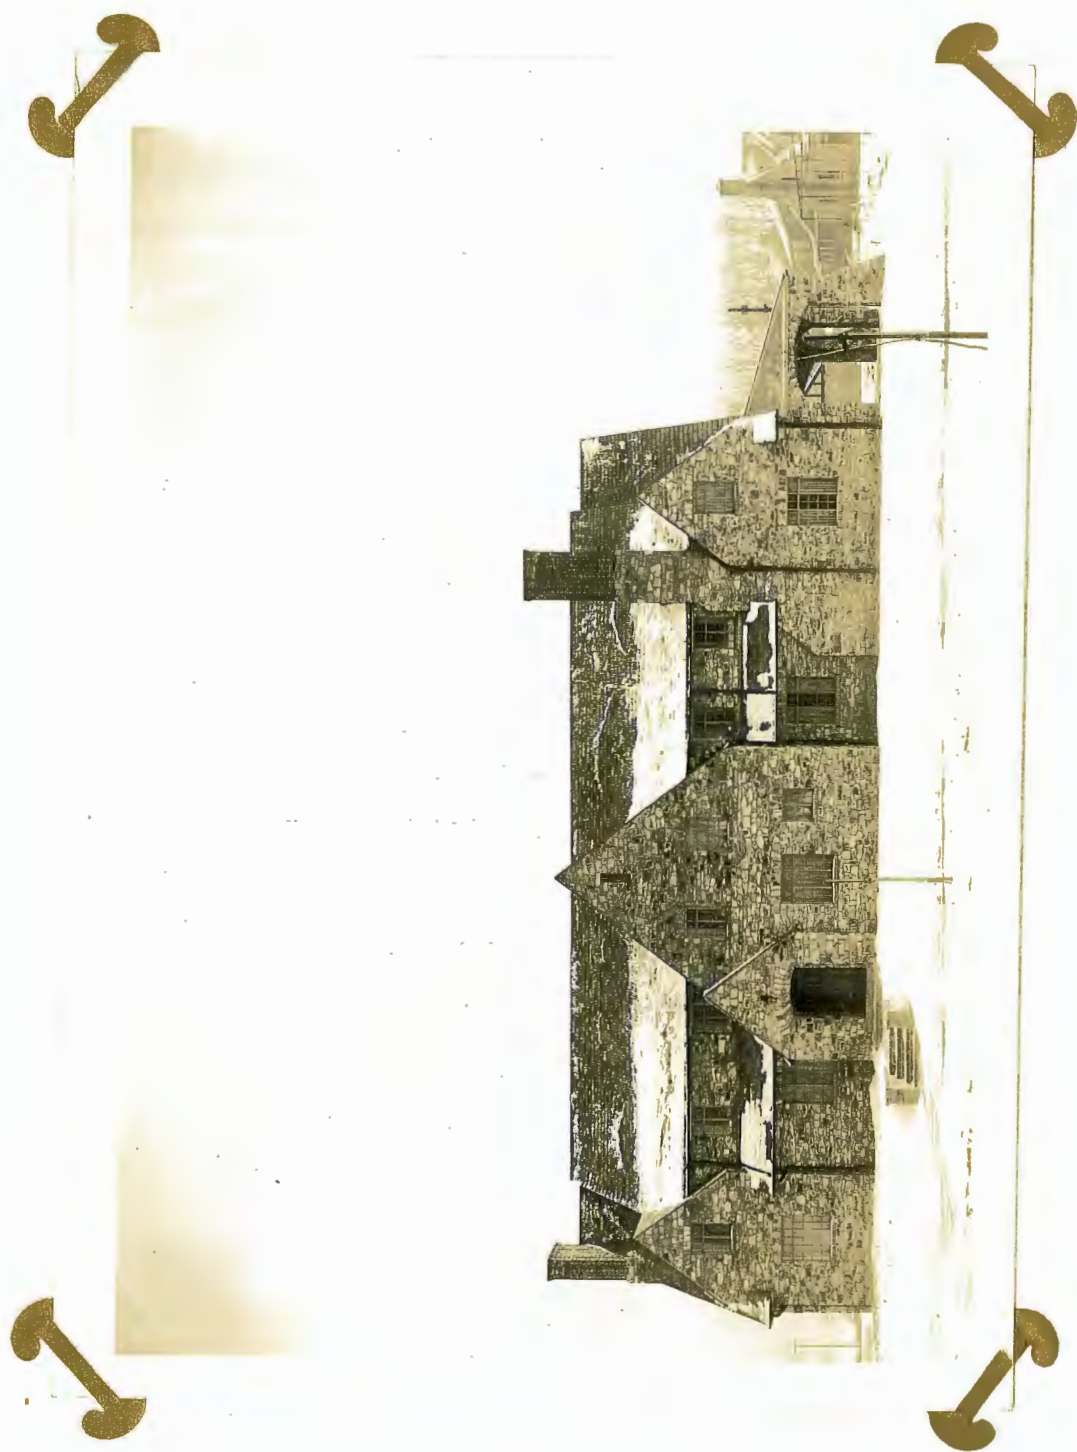

The first home had room for about twenty. From the first the scholastic standing was above the average of similar groups on the campus. They had representatives in most of the activities here at the college. In 1925 the expanding of the fraternity required more room, and a house was leased in the fraternity section of the town. This home made possible a membership of thirty, an increased social activity, and greater comfort in general. About this time the Fraternity purchased three lots in the center of what was being developed into the new fraternity section.

Due to Professor Kuntze's leaving the college, the Fraternity selected three new advisors: Dr. R.E. Dengler, Professor J.E. Kaulfuss, and Professor H.B. Shattuck. These men have continued to serve in this connection up until the present time. After three years of life the Fraternity was fortunate in being able to initiate as an honorary member Mr. Emile Walters, an artist of international reputation. His paintings have been exhibited in the leading art galleries of the world, and his works have won several important prizes and mentions.

With the growth of the Fraternity, visions of a new house became more and more distinct. The finance of the group had been for several years on a sound basis. Departing from the precedent of other local fraternities, first steps toward the erection of a new house were undertaken. Plans for a house were received from several architects and a definite building committee began to work. After several consultations with their attorney, a financial prospectus was drawn up which outlined the plan for raising the money for the new home. House plans were chosen, specifications were drawn up, and bids were received. The contracts were let, and on April 4, 1929 ground was broken.

Throughout the entire summer, work continued, and the fraternity was able to move into its new home in the fall of 1929. The home is of old English style, built of native, fire-marked stone. The entire first floor is taken up by clubrooms and the dining room. There is a large chapter room in the basement. Upstairs the studies and sleeping rooms are arranged in suites. The new home has room for about forty members.

The pledging season for this year was very successful as twenty new men were secured. With the additional prestige lent by the new home there was also an expansion of social and campus activities. That the fraternity is maintaining its scholarship standing can be seen by the number of representatives in honorary scholastic fraternities. The prospect for the Delta Sigma Chi Fraternity, scholastic, financial, and social, are the highest they have been in the history of the organization.

The Pennsylvania State College

SKETCH OF THE COLLEGE

Chartered by the General Assembly of the Commonwealth of Pennsylvania by an Act signed February 22, 1855, The Pennsylvania State College is the Pennsylvania "Land Grant College," and as such is maintained principally through State appropriations. The College is the service institution for higher education in the Commonwealth and functions in the interest and well-being of the people of Pennsylvania who are its real owners.

High in the scenic mountains of Central Pennsylvania, 1200 feet above sea level, where the 4,000 resident students enjoy to the full the opportunities for healthful out-door contacts, and far from the distractions of thickly populated or urban districts, the 2,000 acres of campus and college farm land lie adjacent to the borough of State College, a clean rapidly growing town of about 4,000 population.

To Abraham Lincoln's signing of the Morrill Act of Congress on July 2, 1892, providing for the great chain of Land Grant Colleges throughout the United States, and the resulting acceptance of this act by the General Assembly of Pennsylvania on April 1, 1863, the Pennsylvania State College really owes its existence.

Before the Morrill Act was accepted by the General Assembly which pledged its faith in support of what is now The Pennsylvania State College—the institution had been established as "The Farmers' High School". Action looking toward the establishment of such an institution was first taken in 1855, after several public-spirited citizens had discussed the project for several years, the movement being encouraged by the State Board of Agriculture.

Governor James Pollock and Andrew Curtin, then Secretary of the Commonwealth, were ex-officio members of the first board of Trustees, and the Governor helped to select the site. The State appropriated \$99,900. toward the erection of the original building—"Old Main," which was still in daily use up until a few months ago before it was torn down in the summer of 1929 to make way for the new structure which is rapidly nearing completion and individuals contributed \$66,500. After several sites had been looked over, a gift of 200 acres in Center County was accepted from General James Irvin. An additional 200 acres were purchased afterwards by the board of trustees.

Sixty-nine students composed the first class that drove by bob-sled from Spruce Creek and started work and studies on February 20, 1859, in a course of study leading only to the occupation of farming. Before the close of the first year 19 students were enrolled.

The first president was Dr. Evan Pugh, a young chemist quite advanced in scientific studies. His loss by death within five years was a severe blow to the young institution. He started laboratory work with apparatus brought from Europe, and offered the first graduate work in 1861. The first class was graduated in December, 1861, made up of eleven students. This was probably the first class graduated from a purely agricultural institution in the United States.

Work had so advanced by May, 1862, that the trustees felt called upon to have the name of the institution changed to "The Agricultural College of Pennsylvania". Courses were expanded accordingly, and the college began to attract additional attention.

The faith of Pennsylvania is pledged to this college as: A State institution, chartered by joint act and contract of the United States and the Commonwealth of Pennsylvania, as one of a national system of public institutions to engage in higher education "in such manner as the Legislature of the State may prescribe;"

A State institution with a broad and extensive educational program, obligated to include all industrial interests of the Commonwealth--"to promote the liberal and practical education of the industrial classes in the several pursuits and profession of life."

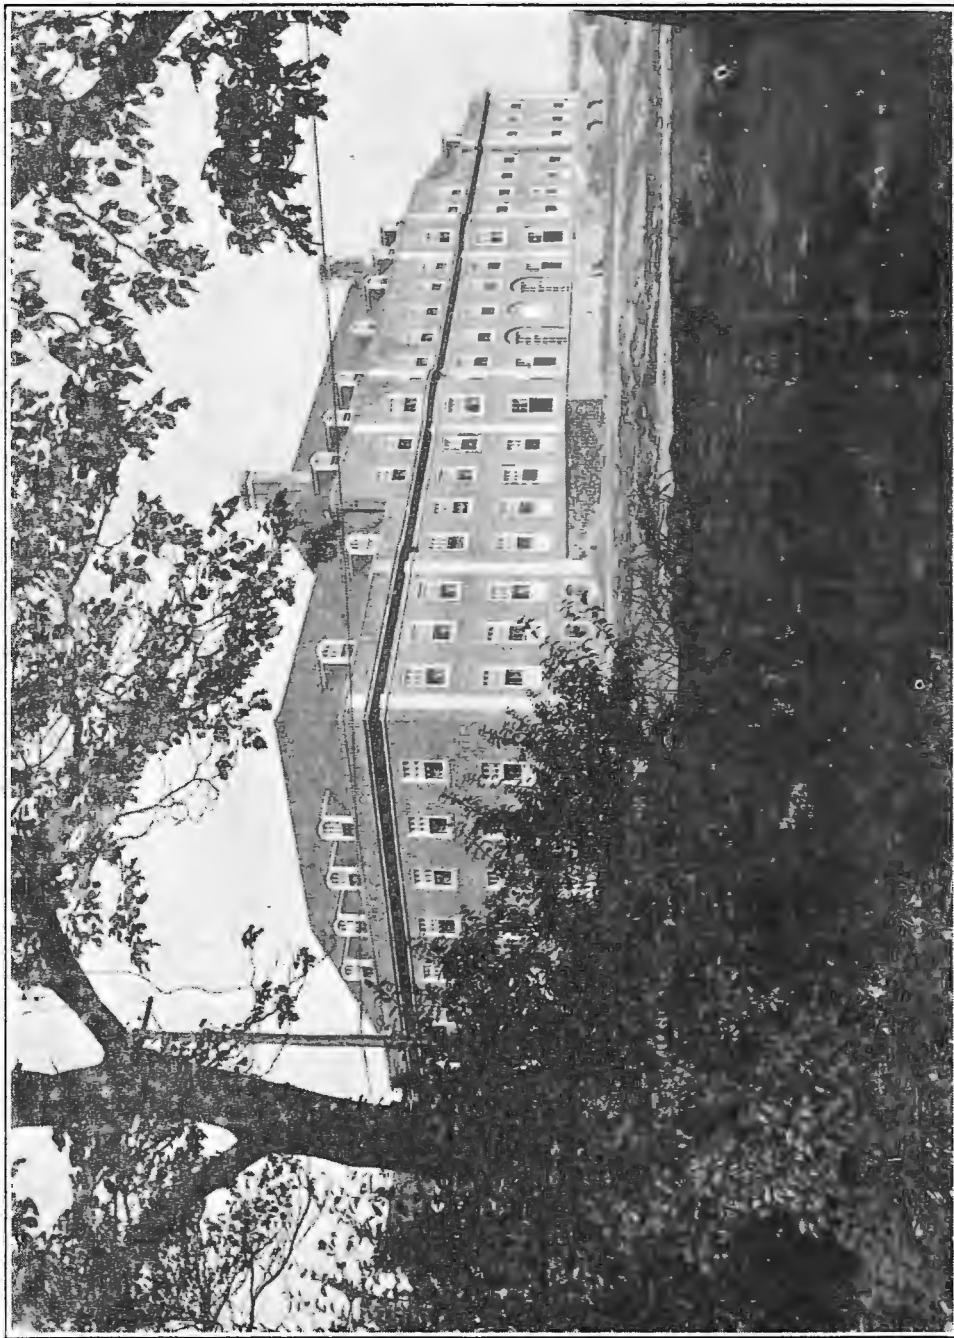

For sixty-four years acts of successive General Assemblies have confirmed the pledge of the Commonwealth to Penn State. Not only does Pennsylvania, in its State College, boast the fifth largest agricultural school in the United States, but it has the third largest engineering school in the east, the first mining school established east of the Mississippi and one of the best known in the country, a school of chemistry and physics that until recently had supplied more graduate chemists than all other colleges and universities in the Commonwealth combined, strong schools of liberal arts and the teaching profession, and a graduate school that is rapidly gaining in reputation and number of students. It is through these schools and their various outside activities that the College is rendering its service to the Commonwealth, with resident instruction, research, and extension projects that reach into practically every square mile of Pennsylvania.

OFFICE OF
THE DEAN OF MEN

April 11, 1930.

National Fraternity
of Alpha Kappa Pi

Gentlemen,

I understand that Delta Sigma Chi, local social fraternity of this college, is preparing a petition for a charter from Alpha Kappa Pi. I am glad to recommend this group as deserving serious consideration from a national fraternity. It has been in existence since 1920 and in my opinion is at present stronger than it was at any earlier time. Its scholastic standing is good. The character of its members is good and in so far as I know its chapter conditions are sound.

Yours very truly,
A.R. Warnock
Dean of Men

THE PENNSYLVANIA STATE COLLEGE

STATE COLLEGE, PA.

DEPARTMENT OF
CLASSICAL LANGUAGES

April 10, 1930.

To the Alpha Kappa Pi Fraternity

Gentlemen,

My good friends, the members of Delta Sigma Chi, a local fraternity at this college are, I learn, petitioning for membership in your organization. In this connection, I am most happy to speak a word in their behalf.

I have been associated with Delta Sigma Chi for about eight or nine years as faculty adviser and friend, and I have watched them make steady growth and progress in every line of personal, fraternal and college activities. A member of an old, established national myself-Pi Kappa Alpha-I feel that this local is by far the best of several excellent ones on our campus, and that their achievements and assets-personal, social, financial, academic, make them the peer of many nationals.

I unhesitatingly recommend Delta Sigma Chi to your most favorable consideration and assure you that my only regret in this matter is the fact that, when they shall have become nationalized, I shall no longer myself be, in the same sense as hitherto, one of them.

I shall be glad to see Alpha Kappa Pi come to our campus and I feel sure that it could come under no possible better auspices than by way of Delta Sigma Chi.

Interfraternally yours,
Robert E. Dengler
Professor of Greek
Head of Department

THE PENNSYLVANIA STATE COLLEGE

STATE COLLEGE, PA.

DEPARTMENT OF
CIVIL ENGINEERING

April 14, 1930.

To the Alpha Kappa Pi Fraternity

Gentlemen,

I have been asked to make a statement to you in regard to the local fraternity at the Pennsylvania State College known as the Delta Sigma Chi.

I have been one of the faculty advisors for this organization for several years and have found the relationship a very pleasant one. The members of Delta Sigma Chi are a fine type of young American manhood. They stand well in our college community both socially and scholastically. Always some of the members will be found participating in the various college activities, either athletic, dramatic, literary, or social.

There is a fairly active and strong alumni group back of them. This group has made it possible, by its cooperation with the active chapter, to build a fine new home situated on Fairmount Avenue in the midst of the so-called Fraternity section of our town. This house is excellent in architectural appearance, built substantially of stone on a good sized lot. It is well designed, commodious and attractive. It is a home such that any national fraternity, barring none, might well be proud to place its name upon the door.

I am very glad to endorse the Delta Sigma Chi as in every way worthy of careful consideration as a possible chapter of your National Organization.

Sincerely yours

Harold B. Shattuck,
Dartmouth 1897, Alpha Delta Phi.
Professor of Railroad Engineering,
The Pennsylvania State College.

THE PENNSYLVANIA STATE COLLEGE

STATE COLLEGE, PA.

DEPARTMENT OF
CIVIL ENGINEERING

April 12, 1930.

To the Alpha Kappa Pi Fraternity
Gentlemen,

I have served as a faculty adviser for
Delta Sigma Chi here for about five years.

This service has been an extreme delight
because my respect and admiration of the members in-
dividually and collectively, high in the beginning
has increased with the passage of time.

In the matter of seriousness, ambition,
and definition of purpose, this fraternity ranks
high, not only with me but with others. It has a-
chieved and held a respectable place among fellow
organizations. Its members have already served prom-
inently in college affairs. I know of no member who
has been in ill-repute.

Scholarship has been good-I believe above the average.

The fraternity has been recognized as a
very human organization, with an evident and real hosp-
tality and sound in all its actions.

In general, Delta Sigma Chi has always been con-
sidered to be "among the best of locals". The reaction
on new folks, entering its portals or having contact
with it, apparently is always complimentary.

My contact with the fraternity and member-
ship has never been intimate but there is no hesitancy
on my part to vouch in this wise for them, for I be-
lieve that Delta Sigma Chi will be found to be a satis-
fying, productive, and creditable unit in any national
organization of which it may become a part.
This is my deliberate judgement.

Yours truly

J.E. Kaulfuss

Professor of Highway Engineering

Beta Province
Alpha Kappa Pi Fraternity

Adelbert W. Heinmiller
PROVINCE CHIEF
224 North Sixth Street

April 15, 1930.

TO THE GRAND EXECUTIVE COUNCIL AND
ACTIVE CHAPTERS OF ALPHA KAPPA PI:

Dear Brothers:

Kindly permit me to add my few words of hearty endorsement and recommendation to you concerning the Delta Sigma Chi Fraternity of Pennsylvania State College whose formal petition you have just reviewed.

To begin with this group was contacted through Dean A.R. Warnock, of Penn State, who recommends the organization very highly as true college and fraternity men of the type desired by every good national fraternity. Delta Sigma Chi ranks in scholarship in the upper level of all the fraternities at Penn State and have men in all forms of extra-curricular activities from athletics to honorary and social participations.

Very little can be said in addition to what has been presented regarding the college itself but let me add that Penn State is one of the highest ranking institutions of the state of Pennsylvania and with its present rate of expansion is most certainly destined to take its place with our best universities in the East.

I have spent several week ends with the boys of Delta Sigma Chi and have been pleased in every respect. They have proven themselves to be a most unusual group by building and financing almost without any outside aid their most complete and beautiful home. Even within the short time I have known any of the men I have formed friendships that I look upon to be lasting in any respect.

So in closing let me urge you to add this splendid and deserving group to the ranks of Alpha Kappa Pi upon their own merits alone. Consequently with the two schools, Lehigh and Penn State on our charter rolls we will have a most firm and enviable foothold in the State of Pennsylvania. I sincerely recommend Delta Sigma Chi to you for what I believe will be favorable consideration and do so without any reservation whatsoever.

Most fraternally yours,
A.W. Heinmiller
Province Chief, Beta Province.
